Houghton Lake Schools Creative In Pandemic Lessons

When the Coronavirus pandemic shut down schools in the spring of 2020, teachers got creative on how they could educate their students. Some teachers created videos and shared them to teach students lessons, some teachers would hold zoom meetings online, some teachers used google classroom.

Mr. Blanchard posted videos on YouTube of himself giving physical education lessons in which students could follow along.

Ms. Lunde & Ms. Bode used zoom meetings to go over this weeks work with the whole classroom watching.

This fall the school transitioned to the Canvas platform for online learning & some stayed on Google Classroom.
